Email Jianjun to schedule an appointment

Course description
This course provides an introduction to basic statistical techniques used by researchers to investigate social, economic, and political phenomena. The statistical techniques you will learn are really just tools to effectively organize data and present information about the world. For example, researchers have recently employed these statistical techniques to answer the following kinds of questions:

“How have societal opinions about same-sex marriage changed over time?”
“Do people who grow up in impoverished communities have better or worse health than those who do not?”
“Are birth defects related to local levels of water pollution?”
“Does getting a college degree have the same labor market benefits for Black and White individuals?”

By the end of this quarter, you too will be skilled enough in the art of statistics to address these types of questions. Just as important, however, this course is designed to help you become informed consumers of social statistics. This will involve attaining an awareness of the many uses of statistics in everyday life, gaining the ability to think critically about the use of statistics, and developing the skills necessary to interpret and critique social scientific research employing these techniques.

This course is designed to introduce you to the logic of statistical analysis, not to test your mathematical abilities. The emphasis of the class is on understanding the concepts and appropriate uses of quantitative methods rather than deriving and memorizing the formulas. A rudimentary familiarity with basic arithmetic and a few algebraic functions will suffice for material presented in the course. More than anything, success in this course requires diligence. The material covered in the course is very incremental, with the presentation of new material building on what you learn in earlier segments of the course. You will have the greatest chance of success if you attend class or view the lectures regularly, start the problem sets early, keep up on your reading, and make sure to visit office hours to get clarification on issues about which you are unsure.

Course Readings
Textbooks: I highly recommended students reference the Joseph Healy book listed below, which can be purchased online or rented for $30 from the publisher.

Highly Recommended Text
Rent from Cengage - [https://www.cengage.com/c/statistics-a-tool-for-social-research-10e-healey/9780357671238PE/](https://www.cengage.com/c/statistics-a-tool-for-social-research-10e-healey/9780357671238PE/)
or Amazon - [https://www.amazon.com/Statistics-Research-Joseph-F-Healey-ebook-dp-B00H7HU8E2/dp/B00H7HU8E2/ref=mt_other?_encoding=UTF8&me=&qid=](https://www.amazon.com/Statistics-Research-Joseph-F-Healey-ebook-dp-B00H7HU8E2/dp/B00H7HU8E2/ref=mt_other?_encoding=UTF8&me=&qid=)

An older version of the Healey text is available for free online: [https://docs.google.com/viewer?a=v&pid=sites&srcid=ZGVmYXVsdGRvbWFpbnx1Y2Njb2RlWJhfGd4OjlvNTc0ZGU1ZThhYmU3ZmI](https://docs.google.com/viewer?a=v&pid=sites&srcid=ZGVmYXVsdGRvbWFpbnx1Y2Njb2RlWJhfGd4OjlvNTc0ZGU1ZThhYmU3ZmI)

*I recognize that the latest edition of this book is relatively expensive. Thus, you are welcome to purchase (or use) a previous edition of the book at a reduced cost. If you encounter financial challenges related to this class, please let me know.

Below is a list of optional texts that you may find useful to have on your bookshelf. I will be drawing from these readings (and will occasionally assign chapters on Canvas) throughout the course.

**Optional Texts:**

**If you are having trouble with STATA, this is an excellent resource.

For a good application of statistics to everyday life, I highly recommend that you add these blogs to your daily reading:

- Family Inequality (Phil Cohen): [http://familyinequality.wordpress.com/](http://familyinequality.wordpress.com/)
- Five Thirty Eight (Nate Silver et al.): [http://www.fivethirtyeight.com/](http://www.fivethirtyeight.com/)
- Vox (Ezra Klein et al.) [www.vox.com](http://www.vox.com)

**Statistical Software and Electronics:** We will be using STATA 16 for in-class demonstrations, problem sets, and the final project. STATA is available for free on the Dartmouth Network (Mac/PC) and is also available on most public computers on campus. For more information on STATA resources and installing STATA on your computer, see the following websites:

[https://services.dartmouth.edu/TDClient/1806/Portal/KB/?CategoryID=13109](https://services.dartmouth.edu/TDClient/1806/Portal/KB/?CategoryID=13109)
Please use these resources and the helpdesk for any installation questions.

In most classes, we will be using STATA in order to demonstrate statistical techniques. I have scheduled weekly STATA labs (see course schedule for details). We may have STATA labs in the last 35 minutes of class from time to time.

A brief note on STATA. Learning a new statistical analysis program and programming language is challenging. To be successful at learning something new, you must practice outside of class to hone your skills. There are many ways for you to get help with STATA: You may ask another student for help with STATA, or ask Juanjun Hua, or visit me via Zoom during office hours with STATA related questions. We will work through this together! In addition, here are some resources that will help you as you learn to code in STATA:

Stata YouTube Channel: https://www.youtube.com/user/statacorp/videos
Jianjun Hua’s research guides: http://researchguides.dartmouth.edu/content.php?pid=316205&sid=2587562
UCLA Stata Resources: https://stats.idre.ucla.edu/stata/modules/
Stata Online Course and Cheat Sheets: http://geocenter.github.io/StataTraining/
Princeton Stata Resources:
http://data.princeton.edu/stata/
http://dss.princeton.edu/training/StataTutorial.pdf
http://dss.princeton.edu/online_help/stats_packages/stata/

Calculator. You will also need to have a calculator to complete your assignments and quizzes, and to participate in in-class exercises. A basic and inexpensive calculator that has square-root and squaring functions is best for use in this class. Make sure to bring your calculator to class every day and to all assessments.

Study group. The Academic Skills Center may be able to arrange a study group for this class. This has been a great resource for students who are less confident in the class. If you are interested in joining the study group contact the Skills Center.

Course Requirements & Grading

Exams (20% each). There will be three exams administered via Canvas throughout the term. Students will have a set amount of time to complete the exam. While not strictly cumulative, each exam will require the use of skills learned earlier in the term. Each exam will consist of a series of problem sets plus a few multiple-choice questions. You are welcome to bring a one page, one side 8 ½ X 11 sheet of paper with formulas or other written information to refer to when taking the exam. You will not use Stata during the exams, but I may ask you to interpret Stata output.

Problem Sets (0%). There will be 6 ungraded homework problem sets this term. I will review the problem sets for completion. For each problem set, I will designate which questions you are required to answer – the rest of the problems can be viewed as practice problems, completed on your own time. Problem sets will be due at the time and date indicated in the Course Schedule. Assignments must be uploaded to Canvas—do not email them to me. For hand-calculations, you may take a photo of your paper and upload it to Canvas.
Students are welcome to work together and help each other on problem sets, but each person MUST turn in their own assignment and provide answers in their own words. Assignments will be posted on Canvas a week before they are due (at the latest). If you did work with someone, please put their names at the top of your homework. I will post answer keys for each problem set by 5 pm the day after they are due so you can check your work. You should be completing the problem sets and checking your work to make sure you are keeping up with the material.

While your problem sets are ungraded, I will collect problem sets and mark for completion. **I will deduct 3 points from your most recent exam score for each problem set you do not hand in. The late policy for problem sets (see below) applies. I will not review problem sets turned in more than 48 hours after the original due date.**

**Group Project (Assignments, Presentation, and Final Product: 40%).** Students will have the opportunity to conduct a project with their classmates, with 3 (or possibly 4) students per group (see the description of the group project on Canvas). The group project is one of the most important, and perhaps the most rigorous aspect of this course. These projects will require a significant time commitment, so it is important to choose a topic that you are excited about and to start working on it early! At the end of the term, you will be asked to evaluate the contribution of your fellow group members to the project. These evaluations will be factored into your project grade. In addition, the group project has several components, with the final report worth the lion’s share of the points. The breakdown for the group project grade is as follows:

- Group Project Assignment 1: 5%
- Group Project Assignment 2: 10%
- Group Project Assignment 3: 10%
- Presentation: 15%
- Final Report: 60%

A final version of the research paper should be submitted via Canvas by the last day of class, but can be submitted any time before the deadline.

**I will use the following scale in assigning grades:**

- 95%-100%: A
- 92%-94.9%: A-
- 89%-91.9%: B+
- 86%-88.9%: B
- 80%-82.9%: B-
- 77%-79.9%: C+
- 73%-76.9%: C
- 70%-72.9%: C-
- 60%-69.9%: D
- Below 60%: E

Please note the following about grades: 1) I do not round grades; 2) I do not negotiate final grades unless an error was made.

**Course Guidelines and Policies**

**Course attendance:** Class will be held in real time in person. Class attendance and participation are not part of your final grade, however, students who attend class regularly tend to do better in this course. I assume that you are serious about your commitment to this class and thus presume that missed classes are due to a good reason. In the event that you miss a class for any reason, you are responsible for getting class notes from another student. As a general policy, I do not make my notes available. After you review your classmate’s notes, I would be happy to meet with you to talk about the material or answer questions about anything that is unclear.
If you need to isolate due to COVID-19, please contact me. For the health and safety of our class community, please do not attend class when you are sick, nor when you have been instructed by Student Health Services to stay home.

**Safety:** In accordance with current College policy, all members of the Dartmouth community are required to wear a suitable face covering when indoors, regardless of vaccination status. This includes our classroom and other course-related locations, such as labs, studios, and office hours. If you need to take a quick drink during class, please dip your mask briefly for each sip. Eating is never permitted in the classroom. (The only exception to the mask requirement is for students with an approved disability-related accommodation; see below.)

If you do not have an accommodation and refuse to comply with masking or other safety protocols, I am obligated to assure that the Covid health and safety standards are followed, and you will be asked to leave the classroom. You remain subject to course attendance policies, and dismissal from class will result in an unexcused absence.

If you refuse to comply with masking or other safety protocols, and to ensure the health and safety of our community, I am obligated to report you to the Dean’s office for disciplinary action under Dartmouth’s Standards of Conduct. Additional COVID-19 protocols may emerge. Pay attention to emails from the senior administrators at the College.

**Consent to Record (if we need to move to remote learning):** Please see the following language regarding your consent to recordings ([https://dcal.dartmouth.edu/resources/course-design-preparation/syllabus-guide](https://dcal.dartmouth.edu/resources/course-design-preparation/syllabus-guide)).

(1) Consent to recording of course meetings and office hours that are open to multiple students.
By enrolling in this course,

a) I affirm my understanding that the instructor may record meetings of this course and any associated meetings open to multiple students and the instructor, including but not limited to scheduled and ad hoc office hours and other consultations, within any digital platform, including those used to offer remote instruction for this course.

b) I further affirm that the instructor owns the copyright to their instructional materials, of which these recordings constitute a part, and my distribution of any of these recordings in whole or in part to any person or entity other than other members of the class without prior written consent of the instructor may be subject to discipline by Dartmouth up to and including separation from Dartmouth.

(2) Requirement of consent to one-on-one recordings
By enrolling in this course, I hereby affirm that I will not make a recording in any medium of any one-on-one meeting with the instructor or another member of the class or group of members of the class without obtaining the prior written consent of all those participating, and I understand that if I violate this prohibition, I will be subject to discipline by Dartmouth up to and including separation from Dartmouth, as well as any other civil or criminal penalties under applicable law. I understand that an exception to this consent applies to accommodations approved by SAS for a student’s disability, and that one or more students in a class may record class lectures, discussions, lab sessions, and review sessions and take pictures of essential information, and/or be provided class notes for personal study use only.

If you have questions, please contact the Office of the Dean of the Faculty of Arts and Sciences.

**Academic Integrity:** Academic integrity is the pursuit of scholarly activity in an open, honest and responsible manner and all members of the Dartmouth community are expected to act in accordance with
this principle. Academic integrity includes a commitment not to engage in or tolerate acts of falsification, misrepresentation, or deception. Such acts of dishonesty violate the fundamental ethical principles of the Dartmouth community and compromise the worth of work completed by others. As such, dishonesty of any kind will not be tolerated and students found in violation of the Dartmouth Academic Honor Principle will be notified and reported to the appropriate authorities (http://student-affairs.dartmouth.edu/policy/academic-honor-principle). For additional resources on the Academic Honor Code, plagiarizing, and proper citation of sources, please see the following link: http://writing-speech.dartmouth.edu/learning/materials/sources-and-citations-dartmouth

Religious holidays: Some students may wish to take part in religious observances that occur during the academic year. If you have a religious observance that conflicts with your participation in the course, please contact me as soon as possible to discuss appropriate accommodations.

Accommodations: Students requesting disability-related accommodations and services for this course are required to register with Student Accessibility Services (SAS; Getting Started with SAS webpage; student.accessibility.services@dartmouth.edu; 1-603-646-9900) and to request that an accommodation email be sent to me in advance of the need for an accommodation. Then, students should schedule a follow-up meeting with me to determine relevant details such as what role SAS or its Testing Center may play in accommodation implementation. This process works best for everyone when completed as early in the quarter as possible. If students have questions about whether they are eligible for accommodations or have concerns about the implementation of their accommodations, they should contact the SAS office. All inquiries and discussions will remain confidential.

Returning to in person learning during this fall term may be challenging due to the impact of the COVID-19 pandemic on all of us and the continued rise in cases in NH and across the nation. The academic environment at Dartmouth is challenging, our terms are intensive, and classes are not the only demanding part of your life. There are a number of resources available to you on campus to support your wellness, including your undergraduate dean (http://www.dartmouth.edu/~upperde/), Counseling and Human Development (http://www.dartmouth.edu/~chd/), and the Student Wellness Center (http://www.dartmouth.edu/~healthed/).

For individual peer tutorial assistance with papers, research, and new media projects, students may use RWIT, the Student Center for Research, Writing, and Information Technology. Make appointments online at www.dartmouth.edu/~rwit.

Classroom etiquette: Disruptions to class negatively affect everyone’s ability to learn. Everyone should arrive to class on time and not leave early. If you must arrive late or leave early, please notify the instructor in advance and sit by the door to minimize disruptions. It is inappropriate to use cell phones or laptops for activities outside of taking notes (such as email, facebook, shopping, etc.). Sidebar discussions with fellow students are disruptive to the professor. Students will be offered a short break (5 minutes) during the course. Students should respect the time frame and return to class within the time allotted.
# Course Schedule

This syllabus is a working document. The course schedule will likely change over the course of the term. You are advised to check the Canvas Website regularly for changes.
